Business Requirements Document (BRD)

1. Document Information

Item	Details
Project Name	
Document Version	
Date	
Prepared By	
Reviewed By	
Approved By	

2. Executive Summary

Provide a brief overview of the project.

Purpose

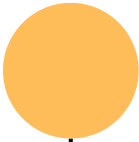

Why is this project needed?

Background

Current business situation

Existing challenges

Opportunity

3. Business Objective

Describe what the organization wants to achieve.

Example:

Increase operational efficiency by 30%

Reduce manual effort

Improve customer satisfaction

Ensure regulatory compliance

Increase revenue

4. Problem Statement

Describe the business problem.

Example:

Current onboarding process is manual, time-consuming, and prone to errors, resulting in delayed customer activation and increased operational costs.

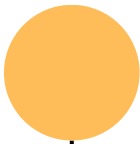

5. Project Scope

In Scope

- Feature 1
- Feature 2
- Process Automation
- Reporting

Out of Scope

- Mobile Application
- Third-party integrations (Phase 2)
- Infrastructure upgrades

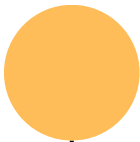

6. Business Requirements

ID	Requirement	Priority
BR-001	Users shall be able to create records.	High
BR-002	Users shall edit existing records.	High
BR-003	System shall generate reports.	Medium
BR-004	Dashboard shall display KPIs.	High

7. Functional Requirements

ID	Requirement
FR-001	User Login
FR-002	Role-based Access
FR-003	Search Functionality
FR-004	Notifications
FR-005	Reports Export

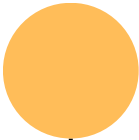

8. Non-Functional Requirements

Category	Requirement
Performance	Response time < 2 seconds
Availability	99.9% uptime
Security	Multi-factor authentication
Scalability	Support 10,000 users
Backup	Daily automated backup
Compliance	GDPR/HIPAA/ISO (as applicable)

9. Stakeholders

Stakeholder	Role	Responsibility
Sponsor		
Product Owner		
Business Analyst		
Project Manager		
Technical Lead		
End Users		

10. Current Process (As-Is)

Describe the current workflow.

Example:

1. Customer submits request.
2. Staff reviews manually.
3. Approval via email.
4. Data entered into system.
5. Confirmation sent.

11. Future Process (To-Be)

Describe the desired future workflow.

Example:

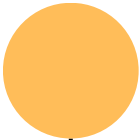

1. Customer submits request online.
2. Automatic validation.
3. Workflow approval.
4. System updates records.
5. Automated notification.

12. Assumptions

- Users have internet access.
- Existing ERP remains available.
- Required APIs are accessible.
- Business rules remain unchanged.

13. Constraints

- Fixed budget
- Fixed timeline
- Regulatory compliance
- Technology limitations
- Resource availability

14. Risks

Risk	Impact	Mitigation
Requirement changes	High	Formal change control
Resource shortage	Medium	Early planning
Vendor delays	High	Buffer in schedule

15. Dependencies

- External APIs
- Vendor systems
- Database availability
- Infrastructure readiness
- Regulatory approvals

16. Success Criteria

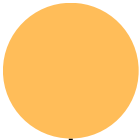

Example:

- Reduce processing time by 40%
- Increase user adoption above 90%
- Reduce errors by 80%
- Go-live within planned timeline
- Meet SLA targets

17. Acceptance Criteria

The project will be accepted when:

- All business requirements are implemented.
- User Acceptance Testing (UAT) is successfully completed.
- Stakeholder approval is obtained.
- Documentation is complete.
- Production deployment is successful.

18. Key Deliverables

- Business Requirements Document
- Functional Specification
- Solution Design
- Test Cases
- User Training Materials
- Deployment Plan
- User Manual

19. Timeline / Milestones

Milestone	Target Date	Status
Requirements Gathering		
Design Complete		
Development Complete		
Testing Complete		
UAT Sign-off		
Go Live		

20. Approval

Name	Role	Signature	Date
