Table of Contents

1. Introduction
2. Purpose
3. Scope
4. Stakeholders
5. User Roles
6. System Overview
7. Functional Specifications
8. UI Specifications
9. Business Rules
10. Validations
11. API Specifications
12. Database Impact
13. Error Handling
14. Notifications
15. Security
16. Reports
17. Assumptions
18. Dependencies
19. Acceptance Criteria
20. Appendix

1. Introduction

Purpose

Describe why the application or feature is being developed.

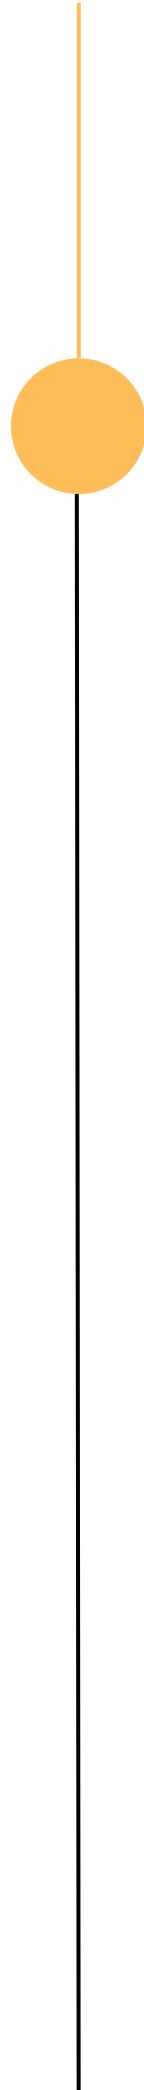

Scope

In Scope

- Authentication
- Dashboard
- User Management
- Reports

Out of Scope

- Mobile Application
- Third-party Integrations (if not applicable)

2. Stakeholders

Role	Responsibility
Client	Business Approval
Product Owner	Requirement Validation
Business Analyst	Documentation
UI/UX Designer	Interface Design
Development Team	Implementation
QA Team	Testing

3. User Roles

Role	Permissions
Admin	Full Access
Manager	Manage Data
Employee	Limited Access
Customer	View Own Data

4. System Overview

Provide a high-level explanation of the feature and include:

- Business Process Flow
- System Context Diagram
- Feature Flow Diagram

5. Functional Specification

Each feature should follow this format.

Feature ID

FS-001

Feature Name

User Login

Objective

Allow registered users to securely access the system.

Actors

- Admin
- Manager
- Employee

Preconditions

- User account exists
- User is active
- Internet connection available

Trigger

User clicks the Login button.

Main Flow

1. Open login page.
2. Enter email.
3. Enter password.
4. Click Login.
5. System validates credentials.
6. Dashboard opens.

Alternate Flow

- **Forgot Password**
- **Login using SSO**
- **MFA Verification**

Exception Flow

- **Invalid credentials**
- **Locked account**
- **Network timeout**

Postconditions

- **Session created**
- **Last login updated**
- **Dashboard displayed**

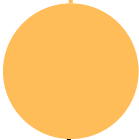

6. UI Specification

Screen Name

Login Screen

Components

Component	Type	Mandatory
Email	Textbox	Yes
Password	Password	Yes
Login Button	Button	Yes
Forgot Password	Link	No

UI Behaviour

Login button disabled until required fields are completed.

Password hidden by default.

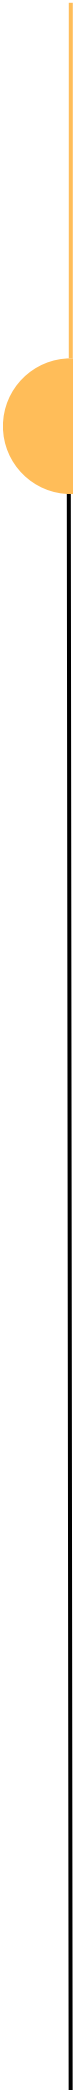

Loading spinner during authentication.

7. Field Specifications

Field	Type	Required	Validation
Email	Email	Yes	Valid Email
Password	Password	Yes	Minimum 8 Characters

8. Business Rules

Rule ID	Description
BR-001	Email must be unique
BR-002	Password expires after 90 days
BR-003	Lock account after 5 failed attempts

9. Validation Rules

Field	Validation
Email	Valid format
Password	8 to 32 characters
Phone	10 digits
DOB	Cannot be future date

10. API Specifications

Item	Value
Endpoint	/api/login
Method	POST
Authentication	None

Request

```
{  
  "email": "user@email.com",  
  "password": "password123"  
}
```

Success Response

```
{  
  "token": "...",  
  "user": {}  
}
```

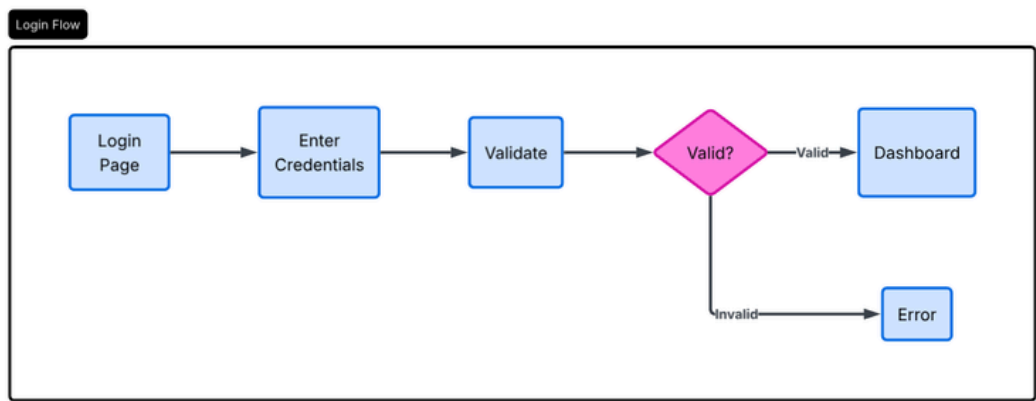

Error Response

```
{  
  "message": "Invalid credentials"  
}
```

11. Database Impact

Table	Operation
Users	Read
Login History	Insert
Audit Logs	Insert

12. Workflow Diagram

13. Error Handling

Scenario	Error
Wrong Password	Invalid password
Network Error	Unable to connect
Session Expired	Please login again

14. Notifications

Event	Channel
Password Reset	Email
Login Alert	Email
OTP	SMS

15. Security Requirements

- Password hashing
- JWT Authentication
- HTTPS only
- Role-Based Access Control (RBAC)
- Session timeout after inactivity
- Audit logging

16. Reports (if applicable)

Report	Users
Login History	Admin
User Activity	Manager
Audit Report	Admin

17. Non-Functional Considerations

Category	Requirement
Performance	Response < 2 seconds
Availability	99.9% uptime
Scalability	Support 10,000 users
Accessibility	WCAG 2.1 AA compliant
Browser Support	Chrome, Firefox, Safari, Edge

18. Dependencies

- Authentication Service
- Email Service
- SMS Gateway
- Database
- Payment Gateway (if applicable)

19. Assumptions

- Users have internet access.
- Required services are available.
- External APIs are operational.

20. Acceptance Criteria

ID	Criteria
AC-001	User logs in with valid credentials
AC-002	Invalid credentials display an error
AC-003	Locked users cannot log in
AC-004	Successful login redirects to the dashboard

21. Traceability Matrix

Business Requirement	Functional Specification	Test Case
BR-001	FS-001	TC-001
BR-002	FS-002	TC-002

22. Appendix

Wireframes

- Login Screen
- Dashboard
- User Management

API Collection

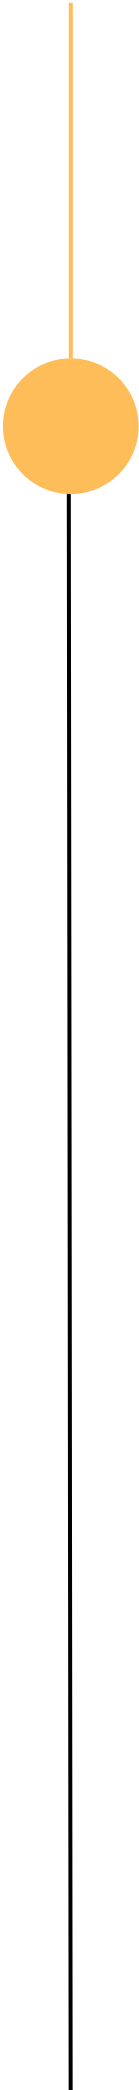

- Postman collection
- OpenAPI/Swagger documentation

Mockups

- Figma links
- UI screenshots

Glossary

Term	Meaning
RBAC	Role-Based Access Control
JWT	JSON Web Token
API	Application Programming Interface
CRUD	Create, Read, Update, Delete
