Table of Contents

1. Executive Summary
2. Product Vision
3. Problem Statement
4. Goals & Objectives
5. Success Metrics
6. Target Users
7. User Personas
8. User Stories
9. Product Scope
10. Functional Requirements
11. Non-Functional Requirements
12. User Flow
13. Wireframes
14. Assumptions
15. Constraints
16. Risks
17. Dependencies
18. Milestones
19. Acceptance Criteria
20. Future Enhancements

1. Executive Summary

Provide a brief overview of the product.

Example:

CuraEdge is a cloud-based clinic management platform designed to help healthcare providers manage appointments, patient records, billing, and communication from a single application.

2. Product Vision

Describe the long-term vision.

Example:

Build an easy-to-use healthcare platform that simplifies clinic operations while improving patient experience.

3. Problem Statement

Describe the problem.

Current Challenges

- Manual appointment booking
- Paper-based patient records
- Missed appointments
- No centralized reporting
- Slow billing process

Why This Matters

- Time lost
- Human errors
- Poor customer experience
- Revenue leakage

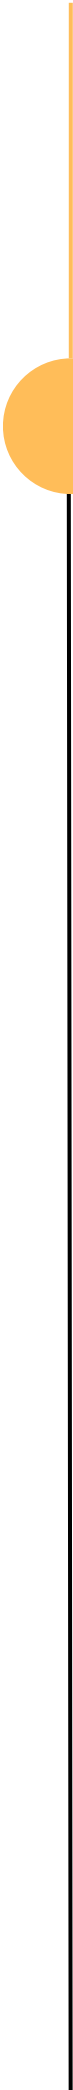

4. Goals & Objectives

Business Goals

- Increase operational efficiency
- Reduce administrative effort
- Improve customer satisfaction
- Increase revenue

Product Goals

- Digital appointment booking
- Online payments
- Automated reminders
- Centralized patient records

5. Success Metrics (KPIs)

Metric	Target
Appointment booking time	< 2 minutes
User adoption	80% within 3 months
Missed appointments	Reduce by 30%
Customer satisfaction	> 4.5/5
System uptime	99.90%

6. Target Users

User Type	Description
Admin	Manages the platform
Receptionist	Books appointments
Doctor	Reviews patients
Patient	Books and manages appointments
Accountant	Handles billing

7. User Personas

Persona 1

Name: Receptionist

Goals

- Book appointments quickly
- Manage patient details
- View doctor availability

Pain Points

- Manual scheduling
- Double bookings
- Paper records

Persona 2

Name: Patient

Goals

- Easy appointment booking
- Receive reminders
- View appointment history

8. User Stories

ID	User Story	Priority
US-001	As a patient, I want to book appointments online so I can avoid calling the clinic.	High
US-002	As a doctor, I want to view my daily schedule so I can prepare for appointments.	High
US-003	As an admin, I want to manage users so I can control system access.	Medium

9. Product Scope

In Scope

- User Authentication
- Dashboard
- Appointment Management
- Patient Records
- Billing
- Notifications
- Reports

Out of Scope

- Pharmacy Management
- Inventory Management
- Insurance Claims

10. Functional Requirements

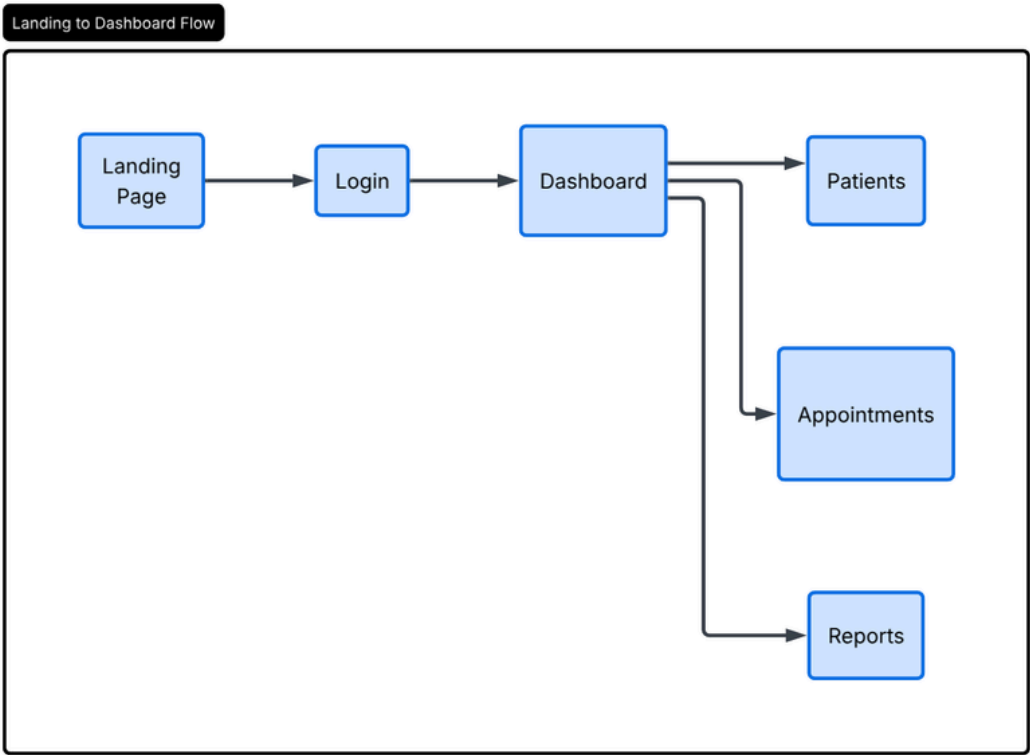

ID	Requirement	Priority
FR-001	User Login	High
FR-002	Patient Registration	High
FR-003	Appointment Booking	High
FR-004	Invoice Generation	Medium
FR-005	Reports	Medium

11. Non-Functional Requirements

Category	Requirement
Performance	Response time < 2 seconds
Availability	99.9% uptime
Security	RBAC, HTTPS, encryption
Scalability	Support 10,000 users
Accessibility	WCAG 2.1 AA

12. User Flow

Example:

13. Wireframes

Include links or images for:

- Login
- Dashboard
- Patient List
- Appointment Booking
- Billing
- Reports

14. Assumptions

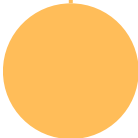

- Users have internet access.
- Third-party APIs are available.
- Payment gateway credentials are configured.

15. Constraints

- Web application only.
- English language support for MVP.
- Cloud deployment required.

16. Risks

Risk	Impact	Mitigation
API downtime	High	Retry mechanism
Low user adoption	Medium	Training and onboarding
Scope creep	High	Change control process

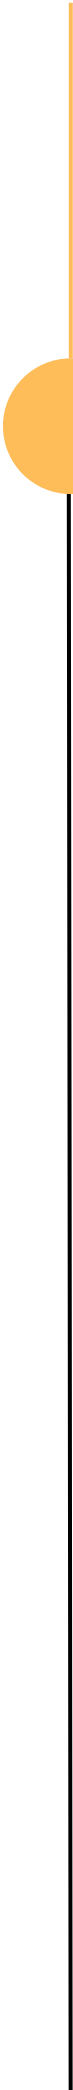

17. Dependencies

- Authentication Service
- Payment Gateway
- Email Service
- SMS/WhatsApp Service
- Database
- Cloud Hosting

18. Release Plan & Milestones

Phase	Deliverable	Target Date
Phase 1	Authentication	
Phase 2	Appointment Module	
Phase 3	Billing	
Phase 4	Reports	
Phase 5	Production Release	

19. Acceptance Criteria

Feature	Acceptance Criteria
Login	Valid users can sign in successfully.
Appointment Booking	Users can create, update, and cancel appointments.
Billing	Invoices are generated with correct totals.
Reports	Reports can be filtered and exported.

20. Analytics & Tracking

Event	Description
User Login	Track successful logins
Appointment Booked	Track completed bookings
Payment Completed	Track successful payments
Report Exported	Track report downloads

21. Future Enhancements

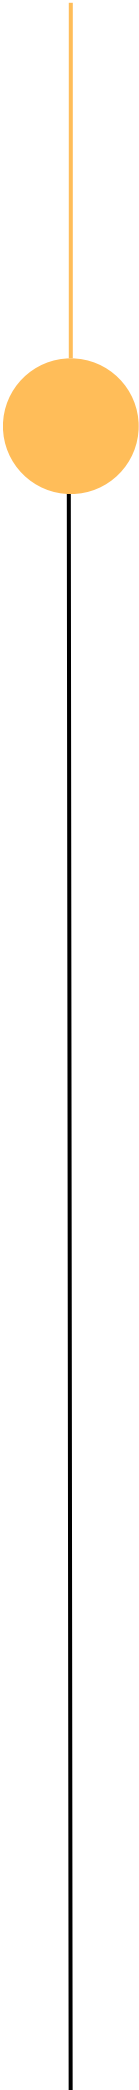

- Mobile applications (iOS/Android)
- AI-powered appointment scheduling
- Voice assistant integration
- Telemedicine support
- Multi-language support
- Advanced analytics dashboard

22. Open Questions

ID	Question	Owner	Status
OQ-001	Should guest booking be allowed?	Product Owner	Open
OQ-002	Is partial payment supported?	Business Team	Open

23. Glossary

Term	Meaning
PRD	Product Requirements Document
MVP	Minimum Viable Product
KPI	Key Performance Indicator
RBAC	Role-Based Access Control
API	Application Programming Interface
CRUD	Create, Read, Update, Delete
