Date	
Status	Draft / Review / Approved

Revision History

Version	Date	Author	Changes
1			Initial Draft

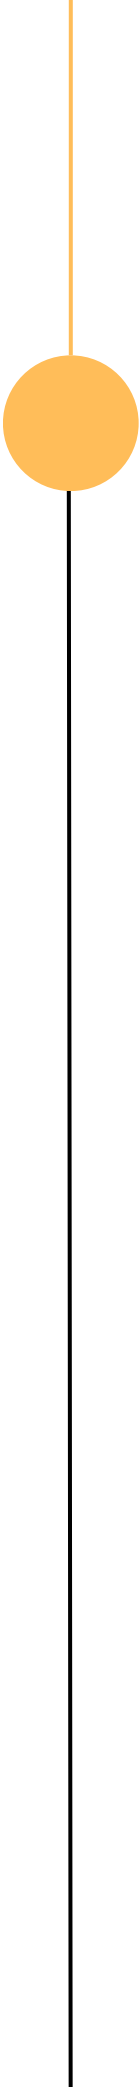

Table of Contents

1. Project Overview
2. Business Requirements
3. Stakeholders
4. User Roles
5. Functional Requirements
6. Non Functional Requirements
7. Business Rules
8. User Stories
9. Use Cases
10. Data Requirements
11. Integrations
12. Constraints
13. Assumptions
14. Risks
15. Acceptance Criteria
16. Appendix

1. Project Overview

Purpose

Why is the project being built?

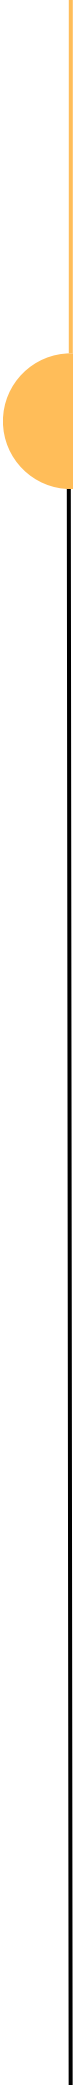

Background

Current business process and existing problems

.

Objectives

- Improve efficiency
- Automate manual tasks
- Enhance user experience

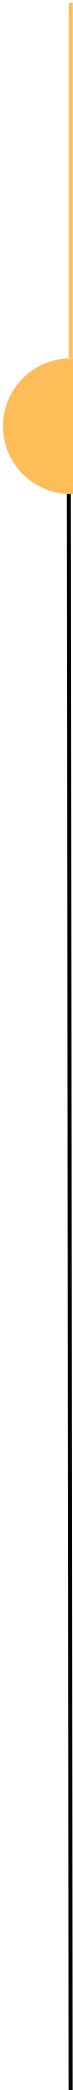

2. Business Requirements

ID	Requirement	Priority
BR-001	Reduce appointment booking time	High
BR-002	Maintain digital patient records	High
BR-003	Generate financial reports	Medium

3. Stakeholders

Role	Responsibility
Client	Approvals
Product Owner	Product decisions
Business Analyst	Requirements
Development Team	Implementation
QA Team	Testing

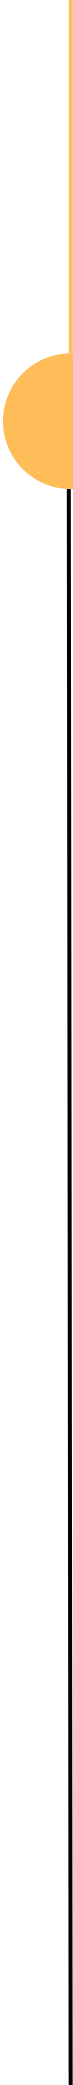

4. User Roles

Role	Permissions
Admin	Full access
Manager	Operational management
Employee	Limited access
Customer	Self-service

5. Functional Requirements

ID	Feature	Description	Priority
FR-001	Login	User authentication	High
FR-002	Dashboard	Display summary metrics	High
FR-003	User Management	CRUD operations for users	High
FR-004	Notifications	Send email and SMS alerts	Medium

6. Non Functional Requirements

Category	Requirement
Performance	Response time under 2 seconds
Availability	99.9% uptime
Security	HTTPS, RBAC, encryption
Scalability	Support 10,000 concurrent users
Accessibility	WCAG 2.1 AA

7. Business Rules

Rule ID	Description
BR-001	Email addresses must be unique
BR-002	Users can only access data permitted by their role
BR-003	Appointments cannot overlap

8. User Stories

ID	User Story	Priority
US-001	As a customer, I want to register an account so I can access the system.	High
US-002	As an admin, I want to manage users so I can control access.	High

9. Use Cases

Use Case: User Login

Actor: Registered User

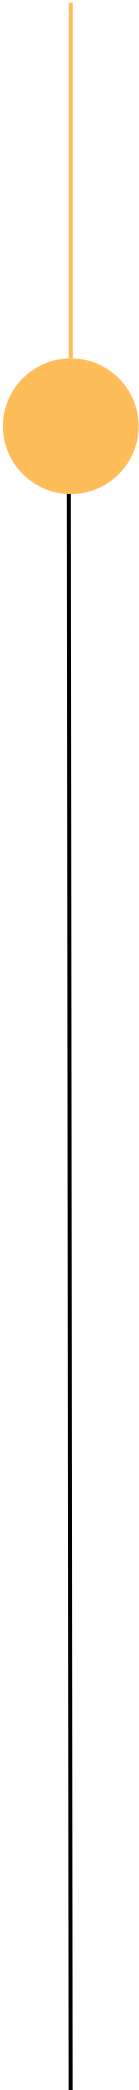

Precondition: User account exists.

Main Flow:

1. Open login page.
2. Enter credentials.
3. Click Login.
4. Dashboard is displayed.

Alternate Flow:

- Forgot password.
- Invalid credentials.

10. Data Requirements

Entities

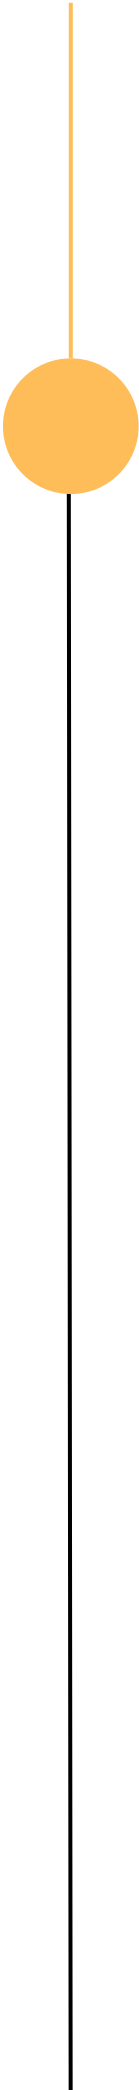

- Users
- Customers
- Orders
- Products

Example

Entity	Key Fields
User	ID, Name, Email
Customer	ID, Contact Number
Order	ID, Date, Status

11. External Integrations

System	Purpose
Payment Gateway	Online payments
Email Service	Notifications
SMS Gateway	OTP and alerts
Analytics Tool	User behavior tracking

12. Constraints

- Web application only
- English language for MVP
- Cloud-hosted infrastructure
- Budget and timeline limitations

13. Assumptions

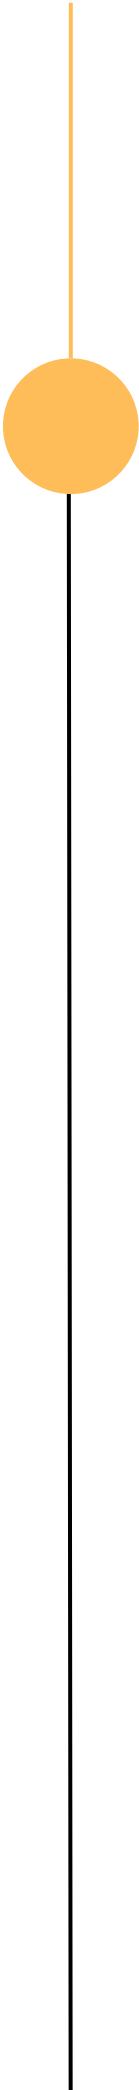

- Internet access is available.
- Third-party APIs are operational.
- Users have valid accounts.

14. Risks

Risk	Impact	Mitigation
Scope creep	High	Change request process
Third-party downtime	Medium	Retry and fallback mechanisms
Low adoption	Medium	Training and onboarding

15. Acceptance Criteria

Feature	Acceptance Criteria
Login	Users can authenticate with valid credentials.
Dashboard	Displays accurate data within 2 seconds.
Reports	Reports can be exported to PDF and Excel.

16. Appendix

Wireframes

- Login
- Dashboard
- Reports

Process Flow

(Add BPMN or flowcharts.)

API References

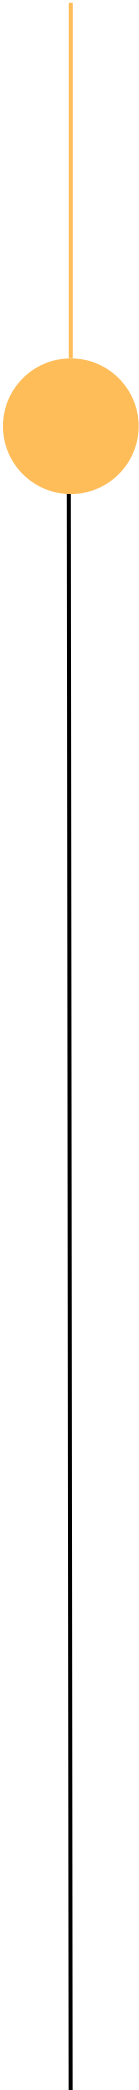

(Add Swagger or Postman links.)

Glossary

Term	Meaning
CRUD	Create, Read, Update, Delete
API	Application Programming Interface
RBAC	Role-Based Access Control
MVP	Minimum Viable Product

When to Use Each Document

Document	Purpose	Best Used For
BRD	Defines business goals and project justification	Enterprise projects, client engagements
PRD	Defines product vision, features, and user needs	Product development
Requirements Document (RD)	Consolidates all requirements into one document	Small to medium projects, startups
FRD	Specifies detailed functional requirements	Development and QA
FSD	Explains feature behavior, workflows, validations, and APIs	Development implementation
SRS	Comprehensive software requirements specification	Large, regulated, or enterprise software
TRD	Defines architecture, technology, APIs, infrastructure, and deployment	Technical implementation and architecture
