Table of Contents

1. Introduction
2. Overall Description
3. System Features
4. External Interface Requirements
5. Non Functional Requirements
6. Data Requirements
7. Business Rules
8. Security Requirements
9. Assumptions and Dependencies
10. Acceptance Criteria
11. Appendices

1. Introduction

1.1 Purpose

Describe why this software is being developed.

Example:

This document defines the functional and non functional requirements for the Clinic Management System. It serves as the baseline for design, development, testing, and deployment.

1.2 Scope

Describe the software at a high level.

Example

The system will provide:

- User authentication
- Appointment booking
- Patient management
- Billing
- Reports
- Notifications

Out of Scope

- Payroll
- Inventory
- Mobile application (Phase 1)

1.3 Definitions

Term	Meaning
Admin	System Administrator
Patient	Clinic Customer
Appointment	Scheduled consultation
API	Application Programming Interface
RBAC	Role Based Access Control

1.4 References

- **BRD**
- **PRD**
- **FRD**
- **FSD**
- **Wireframes**
- **API Documentation**

2. Overall Description

2.1 Product Perspective

Describe where the software fits.

Example

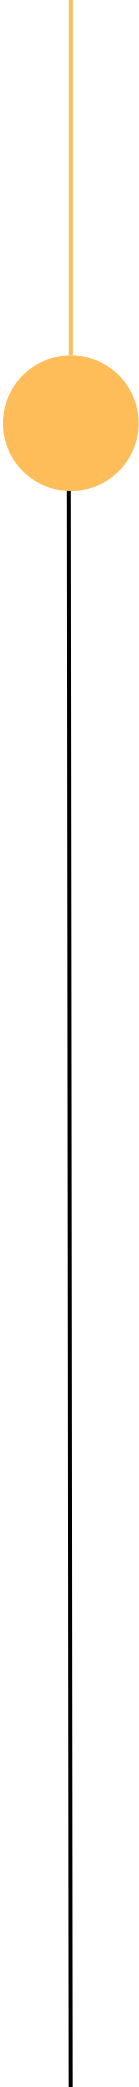

Web based SaaS application for managing clinic operations.

2.2 Product Functions

- Login
- Dashboard
- User Management
- Patient Management
- Appointment Booking
- Billing
- Reports
- Notifications

2.3 User Classes

User	Description
Admin	Complete access
Receptionist	Appointment management
Doctor	Patient consultation
Patient	Appointment booking
Accountant	Billing

2.4 Operating Environment

- Web Browser
- Windows
- macOS
- Linux
- Android Browser
- iOS Safari

2.5 Design Constraints

- HTTPS required
- PostgreSQL database
- REST API
- Cloud deployment
- Responsive UI

2.6 Assumptions

- Stable internet connection
- Email service available
- SMS service available

3. System Features

Each feature should have its own section.

Feature 1

Feature ID

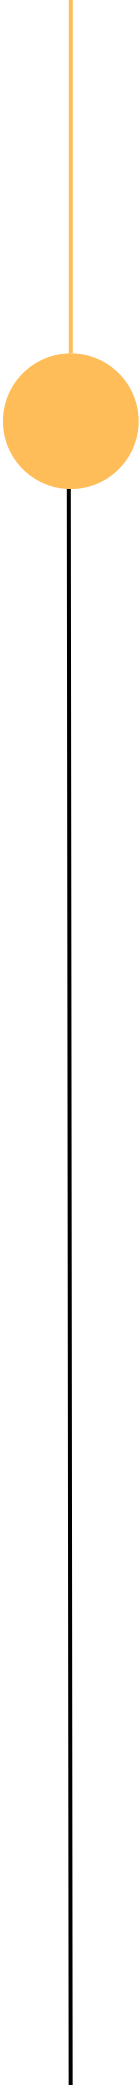

SRS-001

Feature Name

User Login

Description

Users authenticate using email and password.

Actors

- Admin
- Doctor
- Receptionist

Preconditions

- User account exists
- User is active

Main Flow

1. Open login page.
2. Enter email.
3. Enter password.
4. Click Login.
5. System validates credentials.
6. Dashboard loads.

Alternate Flow

Forgot password

Exception Flow

- Invalid password
- Account locked
- Server unavailable

Postconditions

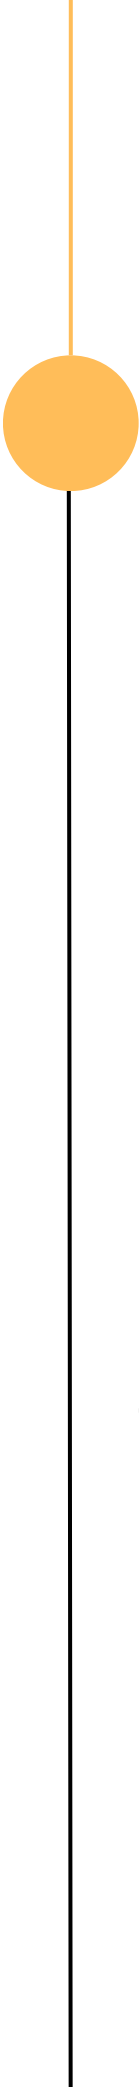

- Session created
- Audit log recorded

Priority

High

Acceptance Criteria

- Valid credentials allow login.
- Invalid credentials display an error.
- Locked users cannot access the system.

Feature 2

Repeat the same structure for:

- Patient Registration
- Appointment Booking
- Billing
- Reports
- Notifications

4. External Interface Requirements

4.1 User Interface

Login Screen

Components

Component	Type
Email	Textbox
Password	Password
Login	Button
Forgot Password	Link

4.2 Hardware Interface

- Desktop
- Laptop
- Tablet
- Mobile Browser

4.3 Software Interface

System	Purpose
Payment Gateway	Online payments
Email Service	Notifications
SMS Service	OTP
WhatsApp API	Appointment reminders

4.4 Communication Interface

- HTTPS
- REST API
- JSON
- WebSocket (if applicable)

5. Non Functional Requirements

Performance

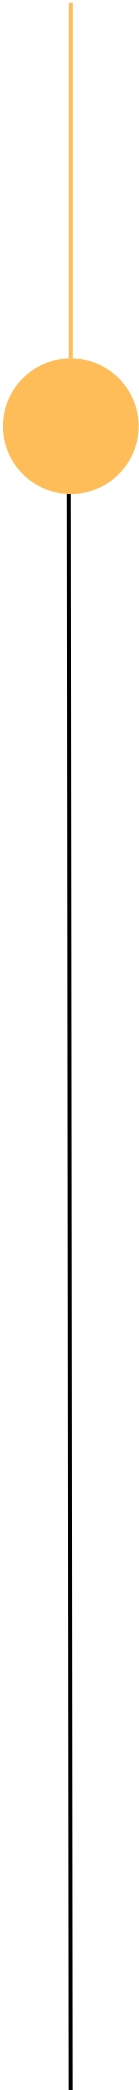

- Response time < 2 seconds
- API latency < 500 ms

Scalability

- 10,000 concurrent users

Availability

- 99.9% uptime

Reliability

- Automatic retry for failed requests

Security

- JWT Authentication
- Password hashing
- HTTPS
- Role based authorization
- Audit logs

Accessibility

WCAG 2.1 AA

Compatibility

- Chrome
- Firefox
- Safari
- Edge

6. Data Requirements

Database Tables

Table	Description
Users	Stores user information
Patients	Patient details
Appointments	Appointment records
Invoices	Billing records

Data Validation

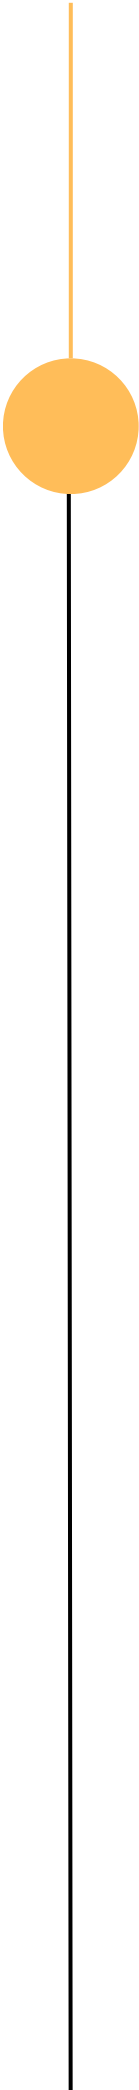

Field	Rule
Email	Valid email
Mobile	10 digits
DOB	Cannot be future date

Data Retention

Patient records retained for 7 years.

7. Business Rules

Rule ID	Description
BR-001	One appointment per doctor per time slot
BR-002	Mobile number must be unique
BR-003	Advance payment required for premium services
BR-004	Cancelled appointments release the slot immediately

8. Security Requirements

- Multi Factor Authentication (optional)
- Password encryption
- Session timeout
- Role based access
- Audit logs
- Data encryption at rest
- Data encryption in transit
- Rate limiting

9. Assumptions and Dependencies

Assumptions

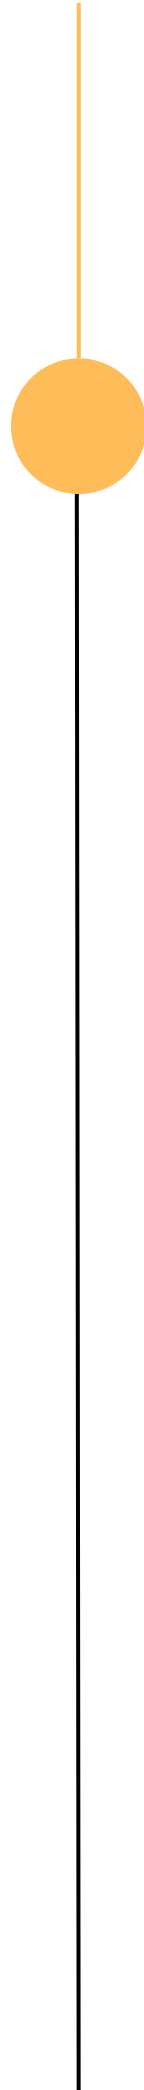

- Internet available
- Third party APIs operational
- Users have valid credentials

Dependencies

- Authentication Service
- Email Service
- SMS Gateway
- Payment Gateway
- Database
- Cloud Hosting

10. Acceptance Criteria

Requirement	Acceptance Criteria
Login	User successfully logs in
Appointment	Appointment created
Billing	Invoice generated
Reports	Reports exported

11. Testability Requirements

Requirement	Test Case
Login	TC-001
Patient Registration	TC-002
Appointment Booking	TC-003
Billing	TC-004

12. Risks

Risk	Mitigation
Payment API downtime	Retry mechanism
Database failure	Automated backups
High traffic	Auto scaling

13. Release Criteria

- All critical defects resolved
- UAT approved
- Performance benchmarks achieved
- Security testing completed
- Documentation approved

14. Traceability Matrix

Business Requirement	Functional Requirement	Feature	Test Case
BR-001	FR-001	Login	TC-001
BR-002	FR-002	Patient Registration	TC-002

15. Appendices

Wireframes

- Login
- Dashboard
- Patient Management
- Appointment Booking
- Reports

API Documentation

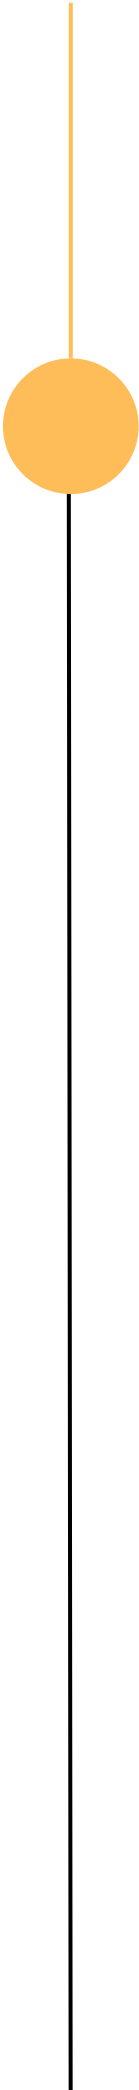

- OpenAPI / Swagger
- Postman Collection

Database Schema

- ER Diagram
- Table Relationships

Process Diagrams

- User Flow
- Sequence Diagram
- Activity Diagram
