Use Case Document (UCD)

Document Information

Field	Value
Project Name	
Document Name	Use Case Document
Version	1
Author	
Reviewer	
Date	
Status	Draft / Approved

Revision History

Version	Date	Author	Changes
1			Initial Draft

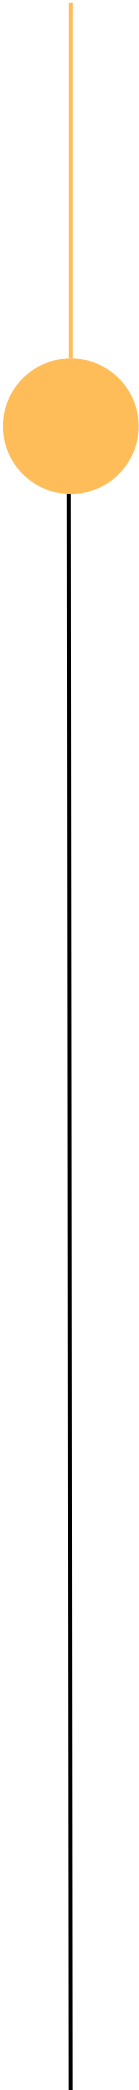

Table of Contents

1. Introduction
2. Actors
3. Use Case List
4. Detailed Use Cases
5. Use Case Diagram
6. Assumptions
7. Business Rules
8. Acceptance Criteria
9. Appendix

1. Introduction

Purpose

Explain the purpose of the document.

Example:

This document defines the interactions between users and the Clinic Management System, describing the workflows required to accomplish business goals.

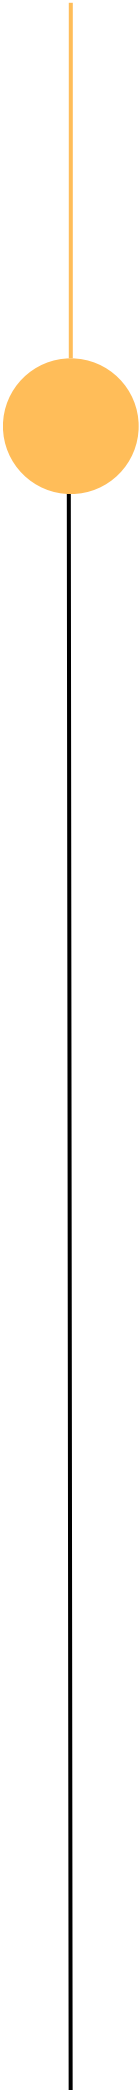

Scope

In Scope

- User authentication
- Appointment booking
- Patient management
- Billing
- Reports

Out of Scope

- Inventory management
- Payroll

2. Actors

Actor	Description
Admin	Manages the entire system
Receptionist	Books and manages appointments
Doctor	Views patients and appointments
Patient	Books appointments and views history
Accountant	Generates invoices and reports

3. Use Case List

Use Case ID	Name	Primary Actor	Priority
UC-001	User Login	Admin/User	High
UC-002	Register Patient	Receptionist	High
UC-003	Book Appointment	Receptionist/Patient	High
UC-004	Generate Invoice	Receptionist	Medium
UC-005	View Reports	Admin	Medium

4. Detailed Use Case Template

Use Case ID

UC-001

Use Case Name

User Login

Goal

Allow registered users to securely access the system.

Primary Actor

- **Admin**

Secondary Actors

- **Authentication Service**

Preconditions

- User account exists.
- User account is active.
- Internet connection is available.

Trigger

User clicks the Login button.

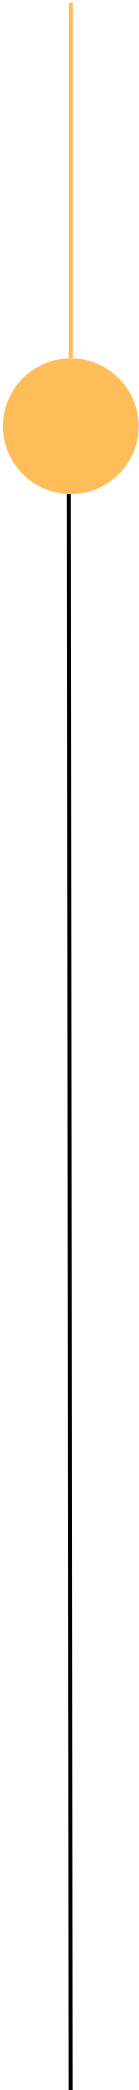

Main Success Scenario

1. User opens the login page.
2. User enters email.
3. User enters password.
4. User clicks Login.
5. System validates credentials.
6. System creates a user session.
7. Dashboard is displayed.

Alternate Flows

A1: Forgot Password

1. User clicks Forgot Password.
2. System requests email.
3. User enters email.
4. Reset link is sent.

A2: Multi-Factor Authentication

1. User enters valid credentials.
2. System sends OTP.
3. User enters OTP.
4. Access is granted.

Exception Flows

E1: Invalid Password

1. System displays an error message.
2. User remains on the login page.

E2: Account Locked

1. System blocks login.
2. User is informed that the account is locked.

E3: Server Error

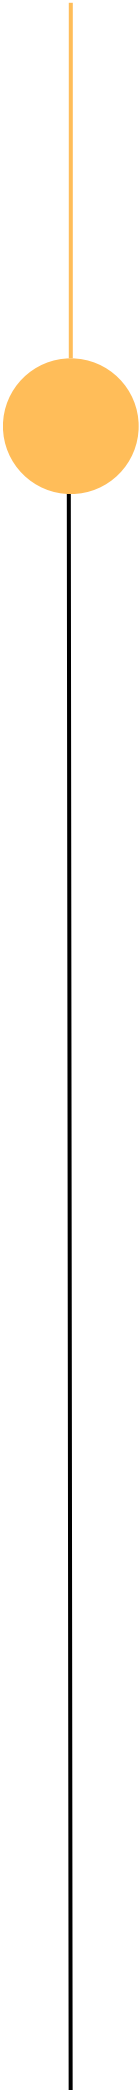

1. System displays a generic error message.
2. User is asked to try again later.

Postconditions

- User is authenticated.
- Login activity is recorded.
- Dashboard is displayed.

Business Rules

Rule ID	Description
BR-001	Password must contain at least 8 characters.
BR-002	Lock account after 5 failed login attempts.

Data Requirements

Inputs

Field	Type	Required
Email	Email	Yes
Password	Password	Yes

Outputs

Output	Description
JWT Token	Authentication token
User Profile	Logged-in user details

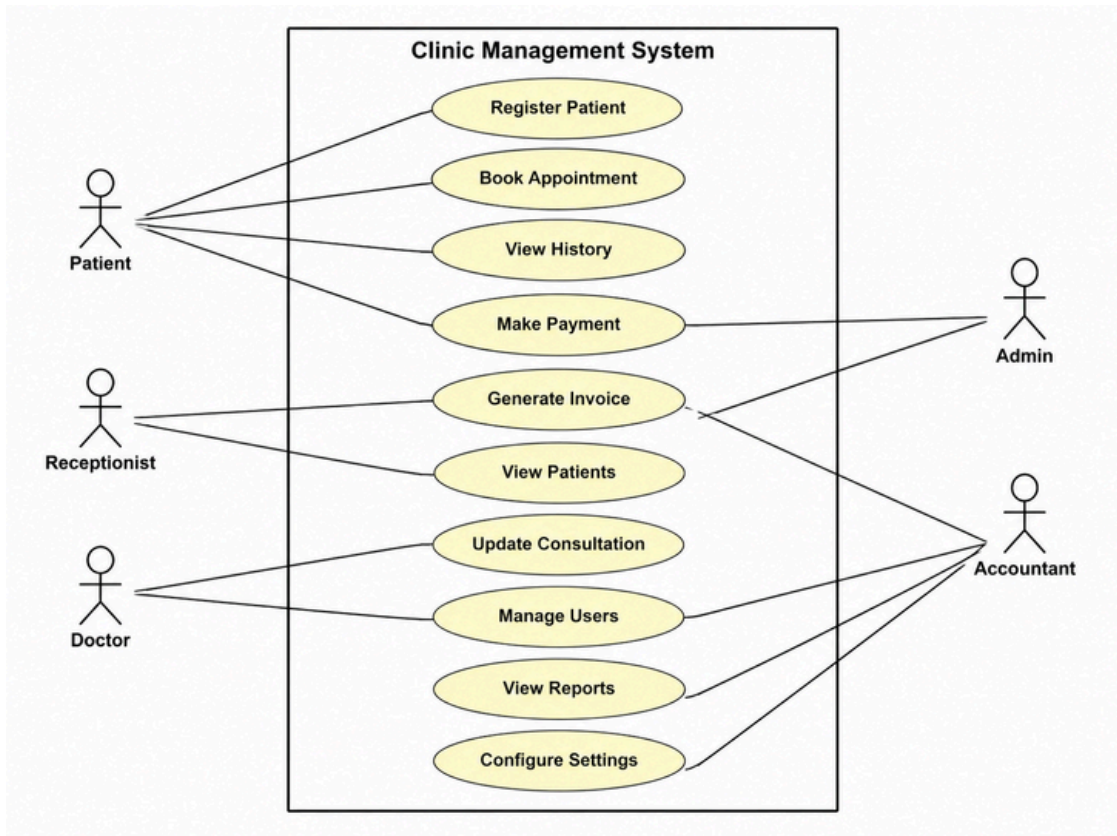

Related Requirements

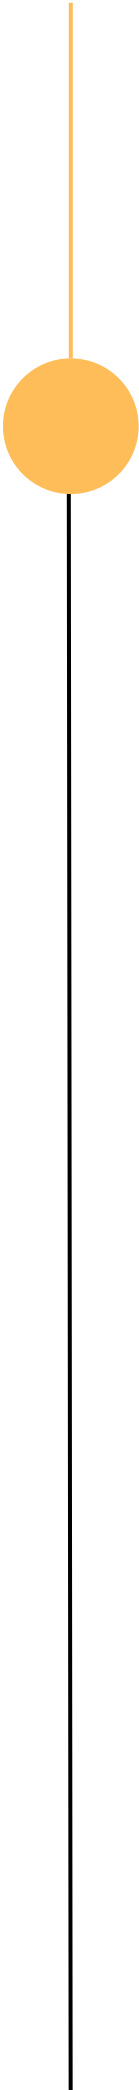

Type	ID
Business Requirement	BR-001
Functional Requirement	FR-001
User Story	US-001

Acceptance Criteria

- Valid users can log in successfully.
- Invalid credentials display an error.
- Locked users cannot access the system.

5. Use Case Diagram

6. Assumptions

- Users have valid accounts.
- External services are operational.
- Network connectivity is available.

7. Business Rules

Rule ID	Description
BR-001	Appointments cannot overlap.
BR-002	Patients must have unique mobile numbers.
BR-003	Premium services require advance payment.

8. Acceptance Criteria Summary

Use Case	Acceptance Criteria
User Login	Valid users can authenticate successfully.
Book Appointment	Appointment is created and confirmation is sent.
Generate Invoice	Invoice is generated with accurate totals.

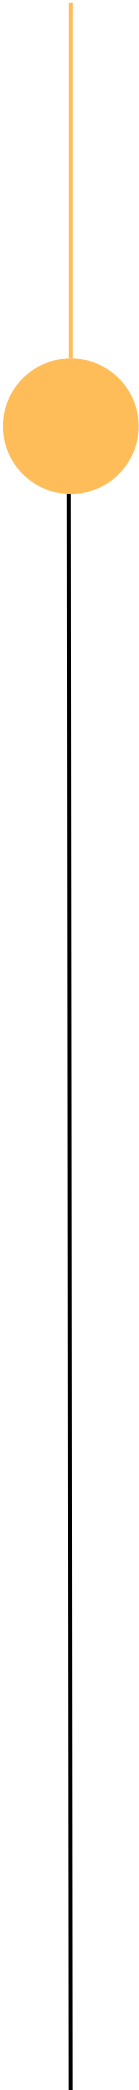

9. Appendix

Wireframes

- Login Screen
- Dashboard
- Appointment Booking

Glossary

Term	Meaning
Actor	A person or external system interacting with the software
Use Case	A sequence of interactions that achieves a user goal
Primary Actor	The main user initiating the use case
Alternate Flow	A valid variation of the main process
Exception Flow	An error or failure path
Preconditions	Conditions that must exist before the use case starts
Postconditions	State of the system after the use case completes

Relationship with Other Documents

Document	Purpose
BRD	Defines business goals and objectives
PRD	Defines product vision and features
FRD	Lists functional requirements
Use Case Document (UCD)	Describes user interactions and workflows
FSD	Explains detailed functional behavior
SRS	Consolidates complete software requirements
TRD	Defines technical architecture and implementation
RTM	Maps requirements through design, development, testing, and release

Difference Between a User Story and a Use Case

User Story	Use Case
Short, user-focused requirement	Detailed interaction workflow
Written in agile format	Structured document with flows
Example: "As a patient, I want to book an appointment so that I can consult a doctor."	Describes preconditions, triggers, main flow, alternate flows, exception flows, and postconditions for booking an appointment
Used mainly for backlog planning	Used for analysis, design, development, and testing
